Instructions for connecting to OpenVPN on a Windows Client (Windows 10)

- 1. Download the OVPN file attached from the email received from the UPD VPN administrator.
- 2. Download and install the OpenVPN client here: https://openvpn.net/downloads/openvpn-connect-v3-windows.msi
- 3. Run the OpenVPN Connect application from the Start Menu

4. The OpenVPN Connect program will have a short tour, you may choose to exit by clicking the "X" at the upper right-hand of the program.

5. On importing a profile, click File and then Browse.

- 6. Browse for the OVPN file you have downloaded from the email.
- 7. Click Add at the upper-right of the application. The server should indicate tunnl.upd.edu.ph.

8. Click the toggle switch to connect.
