Course Title: (UWCP2) Writing as Thinking

Course Description: A university-level foundation course in critical thinking, reading, and writing in English

Pre-Requisite: none

Course Objectives:

1. To describe the process of writing as textual construction: thinking about, questioning, integrating, and creating knowledge itself
2. To relate critical reading to critical writing by reading for ideas in classroom discussions, reading classmate's works for the revision process, and reading for research in writing documented essays
3. To recognize that writing works in a larger context and is directed towards specific discourse communities
4. To participate in a specific discourse community by producing the following types of writing: writing as inquiry, writing as analysis, and writing as conversation

Course Outline:

I. Introduction: Language, Academic Writing and Discourse Communities

This part aims to make students appreciate and understand the two key concepts/guiding principles of the course: writing as thinking and writing for discourse communities.

- A. Writing Moves, Thinking Moves: The diagnostic essay
- B. Academic Writing and Discourse Communities
 1. What is a Discourse? What is a Discourse Community?
 2. Discourse Communities vs Audience: Active production vs passive consumption of knowledge

Suggested Activity:

Analysis of a Discourse Community to which the student already belongs (club, church, fandom, etc.)

- C. The Ethics and Mechanics of Scholarship

II. Module 1: Writing As Inquiry

The aim of this module is to make students understand and generate writing that inquires into or explores a person, place, thing, concept, event, phenomenon, etc. They should be able to formulate questions and further questions, seek possible answers, and present the answers to their queries/investigation in relevant contexts.

III. Module 2: Writing As Analysis

The module aims to make students understand and generate writing to examine, scrutinize or analyze a person, place, thing, concept, event, phenomenon, etc. – to reveal organizational principles, causes and/or effects, prior assumptions/implications, processes, evaluations, etc.

IV. Module 3: Writing As Conversation

This module aims to make students generate writing that highlights the collaborative nature of knowledge that demonstrates how academic writing is essentially a claiming of discursive space.

Possible Themes for Modules 1, 2, and 3 (Reading List found below)

- Civilization
- Nation
- Education
- Perception
- Reading and Critical Inquiry
- Identity/Identities
- Philippine Culture in the Glocal Context

ENGLISH

21 September 2015 (Draft)

To be further improved in collaboration with the faculty of the College of Arts and Letter, College of Fine Arts, and College of Music.

Course Title: Writing for the Arts and Humanities

Course Description: This course aims to develop, through writing projects, the critical, creative, and digital literacy skills applied to the domain of the arts and humanities. The course covers the concepts, tools, and processes writers need to learn in order to critically approach various art forms as well as to articulately express their ideas and accommodate information to specific discourse communities, including those in the Philippines. It offers essential training for students of literature, performance, media, and fine arts to effectively communicate knowledge from their specialized discipline/s. Students will be encouraged to engage in transdisciplinary dialogue and collaborative learning in order to situate the arts and humanities as a vital force in social production and create change in society.

Course Credit: 3

Course Prerequisite: Students have to pass the following courses: Critical Inquiry in Filipino and English and Persuasion and Public Communication

Course Objectives:

1. To develop literacy skills to assess and evaluate artistic texts and to write about these in a way that makes disciplinary information more accessible;
2. To write and create artistic research through papers and projects on intellectual products in the arts and humanities; and,
3. To develop career and life skills – initiative, continuing education, leadership, and responsibility – through these arts-writing projects.

Course Outline:

- I. Introduction: Criticism Workshop
 - A. Art, Gaze, and Power
 - B. Popular Writing and Criticism for the Arts
- II. Module 1 (Compulsory Module) - Writing about the Literary Arts: [Insert theme of choice]
 - A. Introductory texts/ Primary concepts on literature, literary theory, and literary criticism

Course Title: Writing for the Sciences

Course Description: This course focuses on popular science writing that is able to communicate technical and scientific information to a wider audience, and in relation to humanistic concerns.

Course Brief: The discipline of science pursues a scientific method utilizing a particular cognitive mode of inquiry. Its handmaiden is language with which it processes data and draws logical connections, communicating these to the scientific community and the public-at-large. An English for Science course is designed to meet these specific needs of students in science programs.

Course Credit: 3

Course Prerequisite: Students have to pass the following courses: Critical Inquiry in Filipino and English and Persuasion and Public Communication

Course Objectives:

At the end of the course, the students should be able to:

1. recognize the different types of scientific communication and understand their bases in the scientific method;
2. use these types of communication for specific purposes, functions, and audiences;
3. develop sensitivity to the grammatical, stylistic, and rhetorical features of scientific communication;
4. view science writing as a bridge between literature and technical writing in the sciences; and
5. examine issues or trends in science in relation to humanistic concerns.

Course Outline and Suggested Readings:

- I. Overview of the most common types of writing done in the sciences
 - A. The Lab Report (and the IMRAD format of writing)
 - B. The Review Paper
 - C. The Research Proposal and Research Article

D. Short Communication

II. The Scientific Method and the ways of thinking and writing

- “Developing Creativity in Science Among Our Youth” Gisela P. Concepcion
- “What is Science, Technology and Society?” by Benjamin Vallejo Jr.
- “The ‘Nonscientific’ Skills of a Successful Scientist” by Francis de los Reyes III
- “Introduction: Life is a Narrative” by Edward O. Wilson
- “The Science of Scientific Writing” by George Gopen
- “How Scientists are Learning to Write” by Alexandra Ossola

Suggested writing activity: the diagnostic, descriptive essay

III. The Scientist as Community Stakeholder and Nation Builder

- “Rizal, the Scientist” by Ben de Lumen
- “Problems with Media and Scientists” by Flor Lacanilao
- “What to do with Basura?” by Jocelyn Ng
- “The Science of Pink Public Urinals” by Francis de los Reyes III
- “Are there Enough Fish for the People?” by Edgardo Gomez
- “The License Plate Game or Something to Think About While Caught in Traffic” by Carlene Pilar-Arceo

Suggested writing activity: the review paper

IV. The Scientist as Lab Rat and Field Worker

- “A Crash Course in GMOs” by Ameurfina Dumlao-Santos
- “Antibodies: The Good, The Bad, and The Ungainly” by Eduardo Padlan
- “Biological Clocks” by Cherry Mae Ignacio
- “Membrane Separation Process: A Sustainable Technology for Water Purification, Industrial Wastewater Recycling and Reuse” by Michelle C. Almendrala

- “Dinosaurs—and why we didn’t have them in the Philippines” by Marietta de Leon
- “When Coral Reefs Turn White” by Helen Yap
- “Island Magic: Understanding Philippine Biodiversity” Benjamin Vallejo Jr.

Suggested writing activity: the lab report

Note: will add more academic essays/research articles here

V. The Scientist as Humorist and Humanist

- “Oh, the Pangs of Love!” by Richard Selzer, M.D.**
- “Smile” by Alan Lightman**
- “The Brain on Love” by Diane Ackerman**
- “The Egg and the Sperm: How Science has constructed a romance based on stereotypical male-female roles” by Emily Martin**
- “Love Actually” by Richelle Duque**
- “Literature, Science, and the Imagination” by Gmino Abad**

Suggested writing activity: the popular science essay

Required Output:

- 1 documented essay on a specific area of research**
- 1 popular science essay (based on the documented essay)**
- 1 collaborative project to be presented in class**

To be further improved in collaboration with the faculty of the College of Social Sciences and Philosophy.

Course Title: Writing for the Social Sciences

Course Description: This writing course is designed for students majoring in the various disciplines of the social sciences. More than equipping students with specialized writing skill sets that are responsive to the demands of the social sciences, the course enables them to explore the scope of the said field of study and adapt to ever-changing social landscapes. Ultimately, the course enhances the critical faculties necessary to navigate through the issues, problems, and competing discourses that have shaped, continue to shape, and will shape their respective fields.

Course Credit: 3

Course Prerequisite: Students have to pass the following courses: Critical Inquiry in Filipino and English and Persuasion and Public Communication

Course Objectives:

At the end of the semester, the students should be able to:

1. characterize the social sciences as a field of study and examine the issues particular to the field
2. compare and contrast the types of academic papers required in the social sciences
3. write on issues pertinent to a discipline in the social sciences
4. write appropriately for both specialist and non-specialist readers
5. interpret, evaluate, and synthesize data from primary and secondary sources
6. effectively incorporate research data in academic papers
7. write critical and evaluative papers required in their field
8. deliver clear and effective oral arguments and presentations

Course Outline:

I. Introduction: The Social Sciences
A. Disciplinary and professional issues
B. Writing genres required in the discipline

II. Basic Writing: A Review
A. Purpose for writing
B. Audiences: the public, the academic, the professional
C. Writing style
D. The principles of good writing
E. The different writing modes: narrative, descriptive, argumentative, expository

III. Research Methods in the Social Sciences

- A.Primary and secondary sources
 - B.Interviews
 - C.Indigenous research methods
- IV. Writing in the Social Sciences**
- A.Reflective analysis
 - B.Advocacy essay
 - C.Cultural analysis
 - D.Qualitative research essay

COURSE REQUIREMENTS:

In order to pass the course, a student should be able to produce four short academic papers: a reflective analysis, an advocacy essay, a cultural analysis, and a qualitative research essay. These papers should demonstrate not only a facility in writing in English but also a capacity for critical thought, as the student actively engages with issues pertinent to his/her discipline. Active participation in discussions, both in the traditional classroom and via social media sites, is also required.

Note: This is a more “generic” syllabus—meant for a heterogeneous social sciences class. There are syllabi prepared for more homogeneous classes, e.g. a class of psychology students or a class of anthropology students. The syllabus will be tweaked depending on the composition of the class. The syllabus was prepared not only for the students of CSSP but also for those in the College of Education, College of Public Administration, and College of Social Work and Community Development.

Course Title: Writing for the Engineering Sciences

Course Description: This course focuses on writing in and about the engineering sciences, from technical reportage to popular writing.

Course Credit: 3

Course Prerequisite: Students have to pass the following courses: Critical Inquiry in Filipino and English and Persuasion and Public Communication

Course Brief and Objectives:

This course will enable students to present their ideas lucidly and professionally. The contents of this specialized writing course in English for engineering careers include topics in engineering vocabulary, description and report writing for the engineering professions, writing proposals, and delivering winning presentations. Reading materials range from journal articles to popular essays that contain significant profession-related words and phrases, and more importantly, topics related to standards of best practice. At the end of this course, students should be able to –

1. examine issues or trends in the engineering sciences and industry
2. identify distinctions in form and language among the various kinds of writing and reporting done in the engineering sciences; and
3. translate raw data, field reports, or technical information into visualizations for less technical but accurate writing for a wider audience.

Course Outline:

I. The Engineer: Tropes and Themes Worth Considering

- A. The Engineer as Visionary
- B. The Engineer as Parent-Inventor
- C. The Engineer as Explorer
- D. The Engineer as Crisis Manager
- E. The Engineer as Ethicist

II. Writing Practices for the Academic and Professional Engineer

- A. The Professional Resume
- B. The Project and/or Research Proposal

- C. The Engineering Journal Article and/or Executive Summary
- D. Other Technical Reports and Correspondence

Course Requirements

- 1 analytical report or white paper/proposal
- 1 abstract (a condensed version of a published technical research)
- 1 description of an object, mechanism, or process
- 1 essay on popular writing

Suggested Readings:
