<https://oca-upd-portal.netlify.app/?year=all&campus=UPD>

In addition to project information, the implementation status of each infrastructure project is provided in this platform. The enhancement provides a centralized platform where users can view real-time project progress and use the information to support infrastructure planning and monitoring across units. Further, the project updates in the OCA portal will be disseminated to the general public with the assistance of the Diliman Information Office.

The OCA portal also contains information on buildings and public art works on campus.
