Project Title: Comparative Study of Policies, Practices and Bottlenecks in the Graduate Program Across the Four Academic ‘Clusters’ of UP Diliman

Project Proponent: M. Tan

Designation of Proponent: __________

Department and College of Proponent: __________

Project Abstract:

Project 1 will examine more systematically the supply-side factors that influence the ‘output’ of graduates from Masters and PhD programs in UP Diliman. That is, the formal and informal policies and practices implemented in the delivery of graduate programs. Using Diliman-wide OUR statistics from SY 2000-2001 to SY 2012-2013 as reference and the four academic program Clusters – Arts and Letters, Social Sciences and Law, Management and Economics, and Science and Technology – as a frame, Project 1 will use qualitative research methods to compare and contrast policies and practices and identify key success factors or best practices as well as bottlenecks and constraints that may help explain relative high or low Masters/PhD enrolment and completion rates. From the analysis, policy options for enhancing graduate program governance will also be identified.
